1/8	5 Nm	7 Nm
1/4	5 Nm	7 Nm
3/8	5 Nm	7 Nm
1/2	5 Nm	7 Nm

All SWIFFFIT fittings have been equipped with threads and an NBR thread seal that will universally connect to all thread types. Our SWIFFFIT universal fittings also work on non-flat surfaces without compromising its air-tight seal.

UNF Threads

Standard USA design
Designed for use in UNF connections with an integrated NBR o-ring that provides a perfect seal

Torque Specifications

Recommended Torque		
Thread Size	Min.	Breaking torque
10/32	0.8 Nm	3.2 Nm

PTF Threads

Standard USA design. PTF/SAE short thread
Designed for connections with an NPTF thread
Dryseal pipe threads are designed for applications where clearance is not sufficient for the full thread length of NPTF threads.

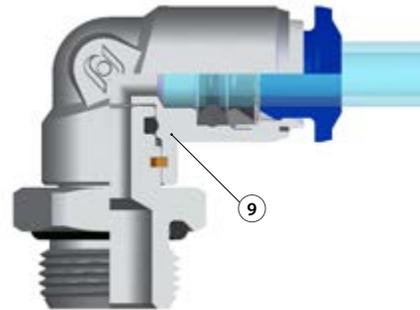

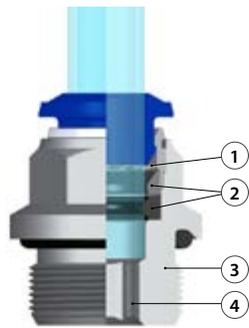

Torque Specifications

Recommended Torque		
Thread Size	Min.	Breaking torque
1/8	5 Nm	8 Nm
1/4	9 Nm	30 Nm

Advantages

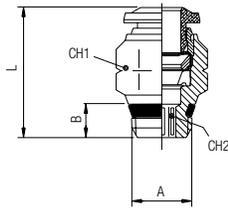

Advantages

- 1 The 303 Stainless Steel gripper ensures a grip on for tubes of any material without damaging their surface. The secure connection between the tube and the fitting will hold up to severe conditions such as impact and vibrations.
- 2 The shape of the safety ring and the molded seal perfectly seals the tube, creating a vacuum.
- 3 Series with multiple types of threads:

SWIFFIT
UNF
PTF
NPTF

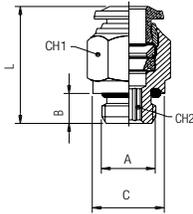

- 4 All straight fittings can be tightened with an Allen wrench because of our internal hex design. This enables the end user to tighten the fitting in spaces too small for an openend wrench.
- 5 Our rotating Swivel Elbow fittings are equipped with a safety ring that enables the fitting to rotate without losing its tight seal.
